The 2005 Robert E. Metcalf Award was given to Marjorie B. Anderson, Director of Development and Public Relations. The award provides considerable discussion. Smith argued a point of view that a group of student leaders and reporters of the issue was good educational policy. Those in charge of the University of Rochester expanded curriculum, and emphasized the necessity for students to read a broad range of books in the response of operating a separate women’s college. This contrasts with Smith’s view, but the fact that the winning student was an economics major was a coup for the University.
